PRODUCT DESCRIPTION

DUGLAS OIL ATF DEXRON IID is a lubricant recommended for automatic transmissions, power steering, hydraulically assisted steering and torque convertors, whenever it is required a DEXRON II D product.

It is also used as an hydraulic oil covering a large temperature range for applications in the automotive, industry and marine field.

APPLICATIONS

It ensures excellent performances in terms of:

- •frictional properties;
- thermal-oxidative stability;
- wear and corrosion resistance.

Thanks to the above mentioned features it also ensures both a low pour point and a reduced foaming tendency.
