

Q8 Chain Lube PTFE

Description

Synthetic, high quality, high adhesion spray lubricant for motorcycle chains containing PTFE

Application

- Q8 Chain Lube PTFE may be used for chains and linkages of on-road and off-road motor bikes as well as for karts and for bi-cycles.

Benefits

- Thixotropic behavior for excellent adhesiveness to the chain
- Resistant to flinging off the chain
- Good elastomer compatibility for use with o-ring type chains
- Provides protection against corrosion under all weather conditions
- Prevents wear due to very good film strength
- Extends effective chain life
- Resistant to high temperatures and pressures
- Reduces friction and allows high load capacity
- Penetrates quickly and easily
