

DELPEN EP Series

General Description:

Delpen EP oils are intended for the lubrication of industrial gear assemblies and transmissions. They contain anti-oxidation, anti-corrosion, and anti-foam additives. Delpen EP oils will not adversely effect steel, copper or bronze. Delpen EP oils contain extreme pressure additives which make them suitable for use in high load and extreme pressure application.

Specifications:

- Delpen EP oils are available in a variety of viscosities.
- Delpen EP oils meet the requirements of the following standards and specifications

U.S. STEEL 224,222,223	AGMA 250.04 ,AGMA 9005-D 94	DIN 51517 PT3 (CLP)
Cincinnati Milacron P-50	SEB 181 226	

Applications:

Industrial gears and transmissions of all types, including screw gears.
Gears and transmissions operating under high loads, extreme pressure and high temperature conditions.
Gear oils and transmissions with a dip lubrication, or with closed lubrication systems.
