**LUBRIPLATE FMO OILS**

\*NSF International H1 & 3H Registered

%These products are certified OU Kosher Pareve+

%These products are Halal certified+

LUBRIPLATE FMO Lubricants are derived from the highest quality USP white mineral oils available. LUBRIPLATE FMO Lubricants offer the utmost in purity, cleanliness, as well as unexcelled lubrication characteristics.

LUBRIPLATE Lubricants have always been non-toxic and as pure as commercially feasible. However, the former United States Department of Agriculture (USDA), Food Ingredient Assessment Division, Science, Food Safety and Quality Service, working within the rules set forth by the Food and Drug Administration (FDA) have drawn up strict guidelines in regard to the type of lubricants that can be used in food processing plants operating under the jurisdiction where there may be incidental food contact with the food being processed. These guidelines also apply to the United States Department of Commerce, Fishery Products Inspection Program. The products in the category of lubricants for incidental contact come under the classification of H-1 replacing the now obsolete "AA" classification.

**FMO-85**

A light SAE 5W oil recommended for dipping, spraying and brushing of lubricated parts and "O" rings as well as airline lubricators. Excellent pour point.

**FMO-200**

SAE 10 grade oil for air line lubricators, general oiling, and hydraulic systems.

**FMO-350**

Medium SAE 20 grade oil for general oiling and hydraulics.

**FMO-500**

Medium Heavy SAE 30 grade oil for general oiling and chain lubrication.

\*Registered H-1 by NSF International for use in food processing facilities as a lubricant or anti-rust agent on equipment in which there may be incidental contact involving the lubricated part and the edible product.

Manufactured with ingredients that comply with FDA 21 CFR 178.3570.

Registered 3H by NSF International - These products are acceptable for use as Release Agents (3H) on grills, ovens, loaf pans, boning benches, chopping boards or other hard surfaces in contact with meat and poultry food products to prevent food from adhering during processing.

LUBRIPLATE FMO-85, FMO-200, FMO-350 & FMO-500 comply with FDA 21 CFR 172.878 (Direct Food Contact).

"LUBRIPLATE FMO Lubricants contain no components derived from TSE/BSE relevant animal species; therefore, they are compliant with the requirements of the TSE Note for Guidance EMA/410/01 Rev. 3 July 2011".
