LUBRIPLATE REFRIGERATION COMPRESSOR OIL 68-N

LUBRIPLATE Refrigeration Compressor Oil 68-N is a highly refined naphthenic oil formulated for use in refrigeration compressor systems utilizing ammonia, CFC (chlorofluorocarbon) and HCFC (hydrochlorofluorocarbon) refrigerants such as R-717, R-11, R-12, R-13, R-113, R-114, R-115, R-22, R-123, R-141b, R-142b, R-500, R-501 and R-502.

LUBRIPLATE Refrigeration Compressor Oil 68-N is essentially wax-free as shown by its low pour point and floc temperature. It will not "wax-out" under low temperature conditions typically encountered in most systems. Equipment lines, evaporator, expansion valve and refrigerant control devices stay clean allowing for maximum system efficiency.

LUBRIPLATE Refrigeration Compressor Oil 68-N is also chemically and thermally stable which minimizes the formation of harmful varnish, gum and sludge deposits.

LUBRIPLATE Refrigeration Compressor Oil 68-N is **not** recommended for use with (HFC) (hydrofluorocarbon) refrigerants such as HFC-134a (R-134a). Distinctions between the different types are not always observed in technical literature. CFC, HCFC, or HFC are sometimes referred to as CFC or Freon in reference to all three molecular types. Therefore, an investigation as to which refrigerant is being used is necessary.

LUBRIPLATE Refrigeration Compressor Oil 68-N meets both Carrier and Trane specifications for use in their refrigeration compressors.

Carrier Approval No's. PP 33-2 and PP 33-3. Trane Specification No. ES2123003 Rev. D

TYPICAL TESTS

Viscosity Range @ 40°C	57.20 - 62.8 cSt
Pour Point °F	-35
Flash Point °F	385
Fire Point °F	435
Floc Point °F	-55
API Gravity	23.8
Color	L 1.5
Dielectric Strength	35 kv
Aniline Point °F	185
Neutralization Number	0.014

LUBRIPLATE Refrigeration Compressor Oil 68-N is available in the following:

Packaging Available

5 Gallon Pail
55 Gallon Drum

Part No.

L0842-060
L0842-062
